SUMMARY

China Mengniu Dairy Co Ltd (China Mengniu Dairy), a Chinese manufacturing and distribution company of dairy products, ranks 53 out of 60 companies – among the lowest ranking companies in the benchmark. The company’s score is based on its poor disclosure and performance across all themes, indicating that it has not yet taken any steps to address forced labor risks in its supply chains. The company is encouraged to improve its performance and disclosure across all themes, particularly Traceability and Risk Assessment and Monitoring.

LEADING PRACTICES

None.

OPPORTUNITIES FOR IMPROVEMENT

Traceability & Risk Assessment: To demonstrate a strong understanding of its supply chains, the company may consider disclosing the names and addresses of its first-tier suppliers, the countries in which its below-first-tier suppliers operate, the countries from which it sources raw materials at high risk of forced labour, and data on the demographics of the supply chain workforce (such as the percentage of women and migrant workers). The company is further encouraged to assess forced labour risks across its supply chains and disclose the risks identified.

Monitoring: The company may consider adopting and disclosing a supplier monitoring process to verify that its suppliers are compliant with its supply chain policies. Implementing specific practices, such as interviewing workers and in particular using worker-driven monitoring (i.e., monitoring undertaken by independent organisations that includes worker participation and is guided by workers’ rights and priorities), may help the company detect forced labour risks in its supply chains. Disclosing information on the results of its monitoring efforts, such as the percentage of suppliers assessed annually and a summary of findings, assures stakeholders that the company has strong monitoring processes in place.
